DNA Testing \$ 35.00

The DNA Testing Form and Instructions will be sent from the CHSA Registrar after payment of \$35.00 for each horse to be tested. (Payable to the CHSA) The CHSA assigns this DNA Sample Form a number and embosses it with the CHSA seal and is assigned to your specific horse. Do not use to send a hair sample from another horse without prior notification and approval by the CHSA Registrar. A & M will not process this sample without an embossed seal on the form. Owner is required to complete this form and send the hair sample with the completed Registration Application package to the CHSA office within 30 days. The CHSA will receive the report directly from Texas A & M and a copy will be mailed to you along with the Certificate of Registration. If there has been an error in listing the correct sire and dam or other information by the person submitting the hair sample resulting in parentage not being qualified, there will be a charge of \$35.00 for each additional test required to determine the correct parentage of the horse.

AVID Microchip \$ 12.00 includes shipping

The Avid Microchip, form and instructions will be sent from the CHSA Registrar after payment of \$12.00 for each horse to be implanted. (Payable to the CHSA) The CHSA assigns this microchip number to your specific horse. Do not use to implant into any other horse without prior notification and approval by the CHSA Registrar.

* Registration fee is charged by the age of the foal at the time all registration requirements are completed by the owner and received by the Registrar. i.e.; application, DNA, microchip and photos.

**Additional DNA testing and microchip verification may be required before issuing a replacement Certificate to ensure the positive identity of the horse. Cost of DNA testing to be paid by the applicant.
